Overview

eZee iMenu presents your restaurant menu in a digital form which is interactive with striking visuals. It is an easy-to-use solution that is highly customizable to meet every requirement of any restaurant type. The innovative solution is integrated with eZee BurrPI, restaurant POS and supports Android Tablets and iPads.

Theme Customization
Comprehensive customization options gives freedom to choose different templates, menu items, pictures, and overall layout that compliments the personality and décor of the restaurant. Furthermore, minor customization changes to reflect seasons and festivities to add that extra charm to the menu and the restaurant.

Interactive Menu
Restaurateurs can fully customize the menu, categorizing various menu groups and items so that customers do not have to scroll through list of items. Making it easier for the customers to navigate and know exactly what they are looking for. Furthermore, you can add descriptions and modifiers for the each item allowing guests to modify items whichever way they want.

Item Modifier
Guests can change an item with modifiers and tailor the item to their preference, that way your kitchen staff knows exactly what the customers have ordered and reduces errors related to items.

POS Integration
eZee iMenu compatible with eZee BurrPI POS making it simple to adapt into your restaurant and the restaurant menu is always up-to-date with latest changes. In addition, eZee iMenu can be interfaced with any POS in the market.

Order/Item Remarks
Guests or waiter can add any specific remark for individual items allowing them to specify any special requests for the items which they may have. In addition, order remarks can be used to specify a common request for the entire order.
Offline Mode
eZee iMenu can be used offline without the need of being connected with the internet all the time. This gives freedom to the restaurant when it comes to using the tablet and avoids down time if there is any kind of internet issue on the premises.

Guest Feedback System
One of the most valuable features of eZee iMenu, management can fully customize all the questions and question type to create custom feedback section. This feature can be changed any time according to the requirement, and further fine-tune their restaurant according customers feedback.

Waiter/Guest Mode
The tablet can be used in guest mode in which the guests can directly order from the tablet or in waiter mode, where the server/waiter can use it to place order on behalf of the customers.

Sync
Once the menu has been updated in eZee BurrPI, it can be updated across all the tablets individually with sync functionality.

Quick Search
Customers or staff can quickly look up items with quick search feature. This feature enables customers to quickly search for a specific item among different sub menu items.

Export Menu
Easily export your current menu from eZee BurrPI or any other POS to eZee iMenu without any hassle. This allows for easy transition and makes it much easier for restaurants to adapt eZee iMenu.
Tablet Modes

**View Only Mode**
View only mode where the customers can freely scroll through the entire menu without the ability to place orders themselves. Waiter can attend the customer where they can place the orders on their behalf using tablet or KOT book.

**Guest Mode**
In this mode, the customer can view the menu and place orders and the staff can deliver order to the table and collect payment once done. This mode is for restaurants who like to adapt a work flow model with minimum staff and faster service.

**Waiter Mode**
In this mode, the waiter can use tablets instead of KOT books for placing orders which will get updated into the POS and KOT will get printed in the kitchen simultaneously. This mode is perfect for restaurants who would like to keep traditional paper menus on their tables while providing their staff with tablets for higher efficiency and better service.
